[www.soundfold.com](http://www.soundfold.com)

Soundfold is a patented\* acoustical wallcovering system consisting of one-piece metal pleating brackets attached to any wall area. Soundfold fabric is then applied to the top bracket and pulled taut at the bottom to form a uniform pleated surface. The fabrics displayed here are inherently and chemically treated to be flame resistant. SF 54 Fabric is manufactured in the USA to our rigid specifications and passes the flame resistance requirements of the: ASTM E-84, NFPA 701 Large Scale, and NFPA 701 Small Scale tests.\*\*

### **SOUNDFOLD SF 54 FABRIC**

Composition: 100% AVORA™ FR Polyester

Width: ± 54"

Weight: ± 6.3 oz/linear yard

Soundfold can custom dye colors to meet your specifications. (Minimum 750 yards for custom orders). Larger samples are available on request. For more detailed information, contact Soundfold Inc. at the above numbers. SF 54 is a proprietary fabric.

\*US Patent 4,342,356

\*\*Detailed flame test information may be obtained from Soundfold Inc.
